Art Unit: 1773

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to a multilayer coating with a semitransparent first layer and a transparent second layer, classified in class 428, subclass 213.
 - II. Claims 15-20, drawn to a coated body panel, classified in class 428, subclass 500+.
 - III. Claims 21-39, drawn to a method of producing a multilayer coating for a body panel by coextrusion and the coated body panel, classified in class 264, subclass 173.16.
2. Inventions III and (I and II) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by forming individual self-supporting films and then laminating the films together.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the coated panel does not require the second layer to be transparent. The subcombination has separate utility such as a self-supporting packaging film.

Art Unit: 1773

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
